PROFILE

Passionate Software Developer with a deep curiosity in web development technologies and beyond. Committed to continuous learning and growth, with a keen eye for detail and a drive for excellence.

EMPLOYMENT HISTORY

Jul 2023

Full Stack Developer, Mims Yazılım A.Ş.

I gained hands-on experience with software development technologies such as Next.js, SQL, Zod, Zustand, and more by building two production-ready web applications for enterprise-level clients.

- Co-authored an in-house component library, accelerating development and reducing time-to-market by 50%.
- Architected an in-app window system, allowing users to navigate freely between windows and increasing user productivity and satisfaction.
- Developed and enhanced a custom form validation library, improving data integrity and user satisfaction.

Feb 2022 — Jun 2023

Long Term Intern, Vodafone

PROJECTS

Ekici Web Automation

Played an integral role throughout the development life cycle of the Ekici Web App, leveraging state-of-the-art web technologies to automate common processes. Collaborated closely with a cross-functional team to deliver a streamlined user interface, enhancing client productivity and satisfaction. Resulted in significant efficiency gains and positive user feedback.

Sedat Tahir A.Ş. Web App

Collaborated closely with a dedicated team to successfully migrate legacy systems to modernized web automation solutions.

Implemented seamless user interfaces, prioritizing accessibility and productivity enhancements. Notable achievements include streamlining workflow processes, reducing manual intervention by 30%, and improving user satisfaction ratings by 25%.

By leveraging innovative web technologies and fostering collaboration, contributed to the transformation of Sedat Tahir A.Ş.'s digital ecosystem, paving the way for enhanced efficiency and growth.

Cash Stash - Personal Finance

CashStash: Your go-to personal finance app. Powered by modern web technologies. CashStash offers a seamless experience to help you manage your finances.

The tech stack includes Next.js, Server Actions, MySQL, and a fully-fledged authentication system. Click [HERE](#) to see the live demo.
